**Wholesale Water Transmission Main Project
South Tacoma Way & 112th Street South to 121st Street East & 22nd Avenue East**

Dear Property Owner,

You may have noticed over the last two years some of the preliminary work Lakewood Water District has been doing along your street for our Wholesale Water Transmission Main Project. The preliminary work included surveying, digging test holes, locating existing underground utilities, and public meetings with some property owners and City or County staff.

We received final approval to proceed with the project construction last year and recently received construction bids for the project. We have awarded a contract to DPK Inc., located in Kent, WA to construct the 4.6-mile long pipeline. The pipeline will be located in the street right-of-way along the alignment shown in the enclosed map. The buried pipeline will be 20-inch diameter ductile iron pipe, except the easterly 1,900 feet of pipe will be 12-inch diameter.

We anticipate the pipeline construction will begin the middle of August and continue until February. The contractor has elected to begin pipeline installation at the west end of the project and progress easterly. You should be able to see work progressing toward your neighborhood well in advance.

If you have questions or concerns, please contact one of us below. Our business hours are Monday thru Friday 8:30 a.m. to 5:00 p.m. For additional information about this project, please go to www.lakewood-water-dist.org

We apologize in advance for any inconveniences this project may present to you and ask for your patience as we complete this very important water supply project for the south Pierce County area.

Roger Nottage, LWD Superintendent
